About Roca

Roca is a family-owned company dedicated to the design and production of solutions for the bathroom space. From our beginnings in Barcelona in 1917, we have grown into a global benchmark in sanitaryware. Roca is now one of the largest producers of bathroom products on the planet, operating 76 production facilities across five continents, employing over 21,000 people and serving over 170 markets.

Our designs are intuitive and intentional. Our philosophy is one of perpetual improvement, and we consistently seek to improve our product experience. Drawing on the knowledge and expertise of our global network, as well as over 100 years of experience in the sector, we develop innovative solutions that refine your bathroom while bringing comfort and simplicity to your daily routine.

Design is ingrained in everything we do. Our teams of experts, often through collaborations with some of the world's leading designers, consistently create products and collections that drive innovation in the sector. These teams, along with our cutting-edge facilities, manufacturing prowess and exceptional

production capacity, have allowed us to maintain our position of global leadership for more than a century. Even while achieving a presence in over 170 markets across the world, we have remained close to our roots. From the beginning, we have been active participants in Barcelona's design culture, where forward-thinking ideas and vernacular styles go hand-in-hand to create natural, intuitive solutions that enhance daily living. We will continue both to draw from and contribute to this community.

We recognise that our position of global leadership comes with responsibility. We seek to set the standard in sustainability at every step of the manufacturing process: from the acquisition

of materials, through to production, logistics, packing and shipping. We design our products with sustainability and efficiency in mind, from toilets that minimise water consumption to furniture made with wood sourced from responsibly-managed forests.

We also carry out projects that help address some of the most pressing global challenges of our time. To this end, our foundation We Are Water works to promote a culture of sustainable, responsible water management, and to provide safe, reliable access to clean water in some of the most disadvantaged communities across the globe.

Our commitment to the planet extends into the social field. We are serious about our responsibility towards our employees and the communities we serve. Our aim of improving people's lives both

within and outside the company has led us to promote initiatives that foster talent and improve the customer experience. We organise design competitions, such as the JumiDesign® and the One Day Design Challenge, which provide opportunities for emerging designers to showcase their creativity and expand their professional networks. And through our six international Roca Galleries, and web platform rocagallery.com, we host events, talks and articles which foster dialogue around some of the planet's most important issues.

We celebrate the small, daily moments of domestic happiness. The bathroom is an intimate space of self-care which can enhance users' daily lives. At the heart of our business is the desire to develop attractive and functional solutions that contribute to improved wellbeing and better standards of living.

We make
people live the
best bathroom
experience

Smart Toilets

Roca's smart toilets offer a range of options to suit different preferences and budgets combining cutting-edge technology, hygiene and comfort to provide users with a modern and connected bathroom experience. Personalised programme settings and easy maintenance and cleaning management can be tailored to individual needs through the Roca Connect App.

Combining
cutting-edge
technology
with maximum
hygiene and
comfort.

Technologies

In-Wash®

Complete wash. Built-in retractable nozzle that directs the water to the most intimate parts, guaranteeing a comprehensive cleanse.

Customisable. The position of the nozzle, the water and air pressure, and the temperature can all be regulated and adjusted.

Easy and Total Control. Mobile app, remote control and side panel to control the functions.

Cleaning. Automatic cleaning of nozzle before and after each use, and water filter that removes waste and impurities. The detachable nozzle ensures effortless cleaning and maintenance.

Easy assembly. Straightforward installation with a standard utility connections.

Cocoon effect. High-performance drying in which fluids tend to follow the surfaces. The design of the nozzle directs air to the precise point where it is needed for peak drying performance at any power level.

Multi-Stream. Different hot wash modes to suit individual preferences.

Hygiene Flush. A distinctive feature by Roca, combining thorough cleaning with subtle aromatisation. With every flush, a refreshing fragrance is released.

Roca Rimless® Vortex

Maximum hygiene. A rimless solution with a powerful 360° flush exceeding EU hygiene standards. A design that facilitates cleaning with minimal water consumption.

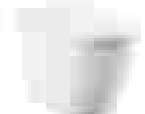

In-Tank®

Space-saving. In-Tank® technology, a signature innovation by Roca, where the water tank is integrated in the bowl, maximising available space, unifying aesthetics and privacy in the bathroom.

Materials

Superglaze®. An exclusive Roca glazing which guarantees even greater hygiene as any dirt particles and bacteria are more easily removed.

Bathroom Collections

The design and innovation of bathroom collections that transform the everyday bathroom experience is woven into the 100-year history of Roca. A combination of traditional stoneware and high-tech innovation in ceramics generate durable and anti-bacterial surfaces with new aesthetic possibilities for different shapes and designs. Technologies such as Roca Rimless® underscore the company's ongoing passion to create the best bathrooms for everyone. An extensive range of styles can be found in washbasins, toilets and bidets. Each piece is set apart by their diverse aesthetic and remarkable longevity, a key characteristic of sustainability.

Key Benefits

Hygiene. Zero porosity surface that prevents the absorption of water and the proliferation of humidity and bacteria.

Quality. Made with an exclusive mineral composition, all consistent and robust pieces undergo rigorous testing and controls.

Durability. The high-quality glaze provides stability against abrasive products, extreme temperatures or ultraviolet light.

Resistance. Solid and robust, with outstanding static resistance verified by load tests of up to 400 kg.

Technologies

Roca Rimless®

Easy cleaning. An interior bowl with no hidden nooks and crannies for dirt and germs to accumulate makes cleaning easier than ever.

Effective flush. Maximum power propels the water with more force and distributes it evenly over the entire surface ensuring a more effective hygiene, surpassing EU standards.

Roca Rimless® Vortex

In addition, Roca Rimless® Vortex features an improved water flow with three extra benefits:

Maximum hygiene. An effective 360° whirlwind flush system with an enhanced water path to ensure complete coverage of every part of the bowl up to four times.

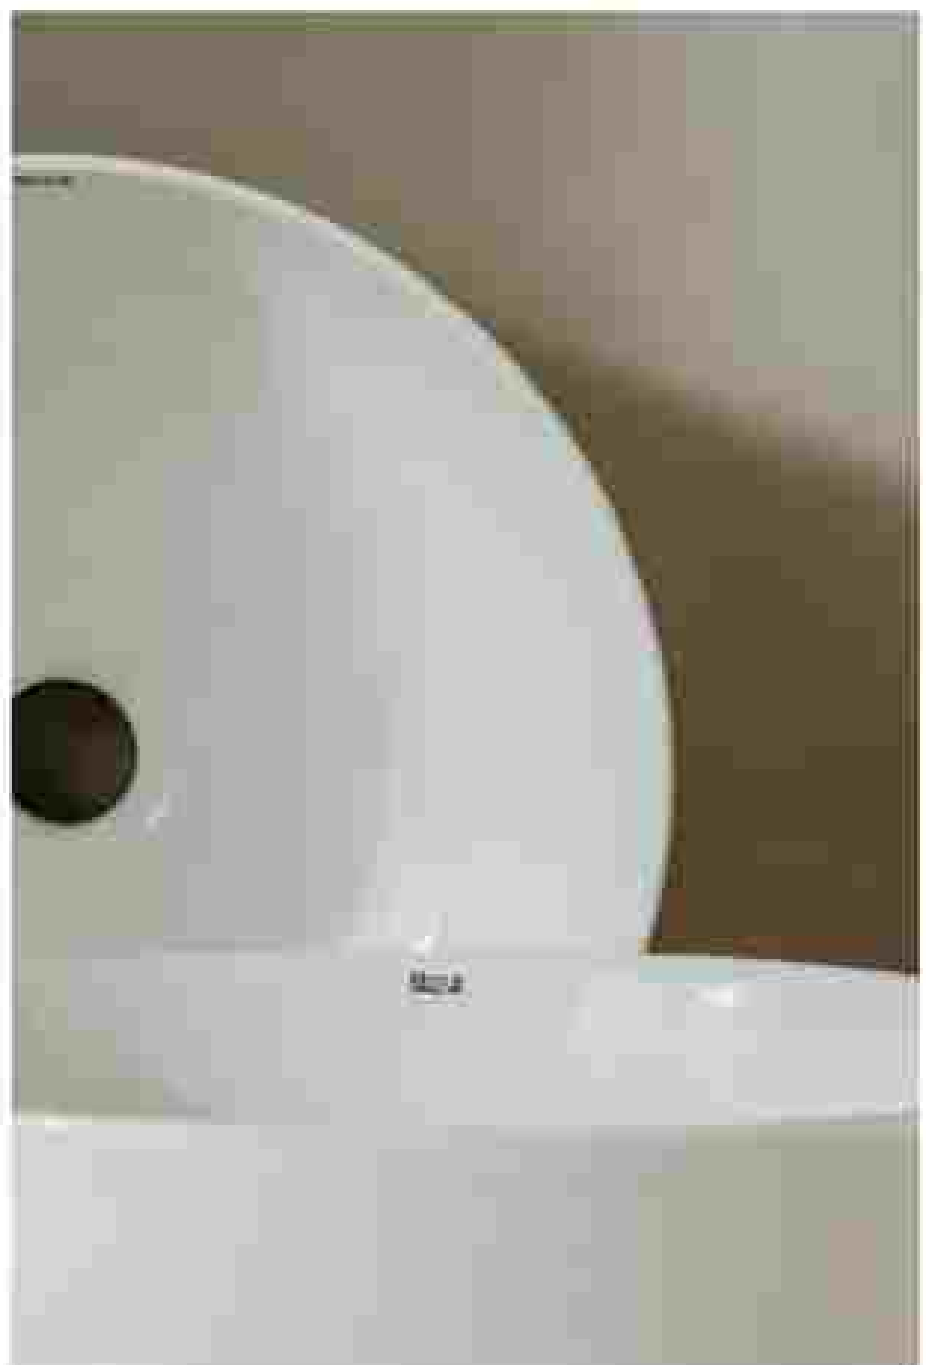

Extra silent. A smoother and more efficient water outlet reduces turbulence and noise.

No splashback. The optimized circular motion of water puts an end to splashing and considerably reduces the effect of aerosols.

Each piece is set
apart by their diverse
aesthetic and
remarkable longevity,
a key characteristic of
sustainability

A combination of
traditional stoneware
and high-tech
innovations in ceramics
enable new aesthetic
possibilities

Materials

Surfex®

Durable material. Made up of a combination of solids, resins, catalysts and promoters, obtaining a highly durable material as a result.

Warm texture. Providing a natural and pleasant sensation to the touch.

Sophisticated finish. Smooth and matt touch, the result of its mineral and resin composition.

Variety of shapes. Highly malleable material that adapts to the most varied profiles, angles and lines.

No visible joints. Surface with a homogeneous colour and a perfect finish in a matt tone, with no visible joints.

Hygienic. Zero porosity material, exclusive to Rock, that prevents the absorption of liquids and the proliferation of humidity and bacteria.

Repairable. Compact material that can be easily repaired and restored to its original appearance.

Sustainable. Composed of organic and 100% recyclable materials.

Cut to size. Easy adaptation to all types of spaces since it can be cut to size.

Supralit®

Hygienic. Zero porosity surface that prevents the absorption of liquids and the proliferation of humidity and bacteria.

Easy cleaning. Seamless surface where dirt can't accumulate, making maintenance easier.

Resistance. Exclusive formulation highly resistant to chemicals and ultraviolet light.

Sustainable. Supralit® seats contribute to reducing the environmental impact thanks to the 47% recycled material of plant origin used in their composition.

Fitoceramic®

Lightness. Thinner walls that allow bodies to be shaped with 40% less thickness.

Firmness. Innovative formulation creating parts that are 30% more resistant than conventional ceramic products.

Hygiene. 100% ceramic material with zero porosity and no joints.

Durability. High resistance to abrasive products and ultraviolet light.

Supraglaze®

Antimicrobial. Super smooth surface of this antimicrobial glazing prevents the spread of viruses and growth of bacteria.

Extremely smooth surface. Waterproof, shiny, smooth surfaces. Sustainable, less water and cleaning products.

Efficient cleaning. Allows any dirt particles to slide off and avoids the buildup of dirt.

Installation systems

Roca's installation systems are meticulously designed to seamlessly fit into any bathroom. These space-saving systems offer adaptable features and a range of solutions, including silent flush and adjustable options to ensure effortless installation. Water-saving is core to the design of all of Roca's installation systems.

Water and energy-saving features are core to the design of all of Roca's installation systems

Key Benefits

Compact solutions. Models that allow wall installation in spaces with a low fitting depth.

Resistance. Guaranteed static resistance of up to 400 kg.

Durability. High performance flush valve with 200,000 activation cycles guaranteed.

Noise reduction. Features noise-reducing components.

Easy maintenance. Easy price assembly and maintenance with convenient access to the inside of the cistern.

Versatility. For any type of installation, including fixation from wood and metal profiles. Smart toilet solutions available.

Adjustable. Easy height adjustment with a 0-200 mm brake system. Position and angle of outlet pipe can also be adjusted.

Water saving. Flushing volume is easily adjusted, various dual flush configurations and flow restrictors available.

Finishes

Matt Colours. Wide range of finishes matching other products with the same finishes.

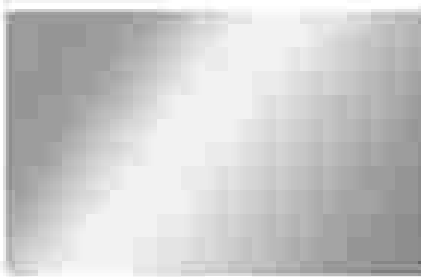

PVD finishes. With a physical vapour deposition process that ensures an elegant finish.

Glass. Operating plates with sophisticated glass finishes.

Transform the look
and feel of your
bathroom space

With over 100 years of knowledge and expertise, Roca is Europe's leader in the production and manufacturing of bathroom furniture. Using new technologies and innovative designs, including proprietary finishes, quality materials, and enhanced hardware solutions, Roca's extensive catalogue of bathroom furniture transforms the look and feel of any bathroom space. Furniture units, auxiliary columns and accessories all meet the highest standards in versatility, accessibility and style, with an ongoing commitment to sustainability and social responsibility.

Key Benefits

Quality. Expertise, finishes, innovative materials and fine elements such as solid wood, marble or quartz.

Styles. Extensive catalogue of designs for every interior design project.

Resistance. High quality guides and hinges that guarantee 20,000 opening and closing cycles.

Adaptability. Diverse selection of size and typology for all kinds of spaces and needs.

Broad range. Broad range of options including line solutions that encompass a bath unit and basin, and Poca solutions featuring line and matching mixer.

Complementary products. Large variety of accessories, basins, auxiliary units (such as column or top unit), mirror, and spotlights.

Comfort. Soft close system for drawers and doors to avoid bumps and noises.

Functionality. Fully retractable drawers allow easy access to the interior space. Drawers glide smoothly and securely.

Adjustable. High-quality door hinges enable easy adjustments in terms of height, depth, or sideways positioning. Reversible auxiliary units allow for left or right installation.

Capacity. Large drawers without a cut-out for the system provide generous storage volume.

Order. Drawers with built-in dividers, hidden compartments and organising boxes that ensure a more optimal distribution of the contents.

Sustainability
and safety are
integrated into
every faucet

A perfect union of precision technology and innovative design defines Roca's bathroom and kitchen faucets. Never before have there been so many possibilities – from colour, shape, finish and size – designed to appeal to a range of tastes and styles. Sustainability and safety are integrated into every faucet: non-toxic, highly resistant finishes such as Everlux PVD allow for a long life span, while energy saving systems such as Cold Start and advanced basin aerators limit and monitor water flow, giving each user peace of mind.

Key Benefits

Durability. Exclusive ceramic cartridge, which allows a soft and precise operation, with the guarantee of one million opening and closing movements.

Water savings. Latest generation of flow restrictors to 5 L/min, regardless of the pressure system, with water savings of 60%*.

Homogeneous flow. Aerators with excellent aerated jet quality, even under complex pressure conditions. They come with an anti-limescale protection for easy cleaning and maintenance.

Adaptability. Four heights for basin faucets (S, M, L, and XL in one piece) to protect the greatest user-handiness.

Acoustic control. Sound reduction system integrated in the cartridges and faucets to limit the noise of the water.

Safety. Protective filter included in the aerators that stops any particles coming through from the mains.

Technologies

Cold Start

Energy savings. Basin models feature Cold Start, cold water opening that guarantees energy savings of 45%*.

Finishes

Everstone

A high-quality chrome outer layer guarantees a permanent shine and makes cleaning easier.

Matt finishes

Porcelain thermosetting powder coating based on polyurethane, resistant to external agents, UV radiation and corrosion.

Materials

Everlux

Sophisticated. Exclusive and fashionable coating that adds distinction and uniqueness to the bathroom.

Sustainable. Purely physical technique that does not require harmful chemicals or generate water pollution during its production process.

Resistant. Additional layer on top of the chrome, based on noble and very hard metals ensuring the surface is extraordinarily resistant to scratches and cleaning products.

*Based on annual savings for a family of 4, considering 2 minutes per day of toilet flushing and handwashing 5 times a day.

Shower Solutions

A simple shower can be transformative without the need for a large space or complicated installations. Designed for any bathroom space and user needs, Roca's shower systems offer universal shower solutions. The ultimate soothing and cleansing experiences come in the form of handheld showers with multiple spray options or ceiling-mounted rain showers. Thermostatic mixers are designed for any type of wall and shower space, while smart shower solutions help reduce energy and water consumption and allow for programmable shower options. Elegant and modern designs, including chrome and matt black finishes on shower fixtures, add style and enhance the overall experience.

Universal
shower solutions
designed for any
bathroom space
and user needs

Technologies

Digital faucets and fittings

Mobile app. Option of programming the shower as filling the bath remotely and establishing different user profiles for a customized experience.

Intuitive use. Simple interface makes it easy to use and understand.

Childproof. Control system that prevents children from adjusting the temperature and flow.

Efficient. Pause mode to keep the temperature stable while waiting up to 20 s to save water and energy.

Disinfection. Cleaning programmes using water at the maximum temperature to eliminate germs and bacteria without chemical products.

Thermostatic faucets and fittings

Quick Reaction® technology. Desired temperature is met a few seconds, keeping it constant and saving water and energy.

Precision. Ergonomic control that allows the user to select the temperature quickly and precisely with a single movement.

Security 38°. Temperature-limiting system that prevents it from exceeding 38° by default.

Safe Touch. Prevents overheating of the faucet body, avoiding burns when touching the metal parts.

Anti-scalding. If the cold-water supply is shut off, the flow of hot water will automatically stop.

Efficiency. Desired temperature is delivered almost instantly to avoid waiting water and energy.

Eco Stop button. Standard flow limiting system in the shower.

Bath Complements

Overview	261
----------	-----

Baths

The right bath can become the centrepiece of any bathroom space. A place to disconnect, soak and rejuvenate, baths need to be both ergonomic and elegant be they freestanding or inset. Roca offers a wide selection of baths available in classic, vintage or modern designs. These baths are crafted using a variety of materials, including cutting-edge components that enable thinner and more curvilinear shapes. Additionally, they incorporate advanced features to enhance hygiene and ensure increased safety.

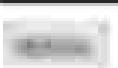

A place to disconnect, soak and rejuvenate, baths need to be both ergonomic and elegant

Hydromassage Systems

Hydromassage Systems

Basic

Continuous water massage. Pneumatic push button.

The Basic system consists of an On/Off water hydromassage function controlled by a pneumatic push button. This system includes lateral adjustable jets that provide a continuous water massage.

Total

Invigorating water massage and relaxing air massage. Electronic digital panel.

The Total system features a water-air hydromassage managed by an LCD digital panel. It offers a range of massage programmes, including continuous or pulsating options, and an electronic Venturi function. This system incorporates lateral back and foot jets, as well as air jets positioned in the head of the bath. All of these jets can be adjusted through the digital panel. The Total system is also equipped with temperature and level sensors to guarantee optimal bath performance.

Tonic

Invigorating water massage. Electronic push button.

The Tonic system features a water-air hydromassage that can be adjusted by means of a power-regulating push button. This system is equipped with lateral adjustable jets to ensure a continuous water massage.

Total Premium

New experiences, better sensations.

The most sophisticated with the most sophisticated hydromassage system by Hoco. Choose relaxing and automatic your relax sessions with the water-resistant remote control with touch screen: massage on the back, left or right sides or new experiences through aromatherapy. The bath with Total Premium hydromassage includes a circulating system and the maintenance of the temperature to maximize your well-being.

Hydromassage Functions

Water massage

The water massage is delivered through jets that disperse a mixture of water and air, creating a stirring effect on the bodies. The intensity of the jets can be adjusted using a manual or electronic control function, depending on the system, allowing for customized water pressures, with a softer or more invigorating experience.

Lower massage: Adjustable jets located on the side of the bath.

Foot massage: Specific for feet.

Back massage: Specific for the back.

Air massage

This massage is performed using bubbles that are released through small jets positioned at the back of the bath. Air or massage is softer and more relaxing than a water massage, and the intensity of the bubbles can be adjusted using various control options.

Two different technologies are available:

Air jets and Soft jets.

Chromotherapy

The Total Platinum system includes the chromotherapy function, which works with 11 LED spotlights that change colour to create an immersive atmosphere. These lights are the ideal complement for a total hydromassage system.

Customization

Some systems allow users to personalize their massage session by creating programmes that align with their individual needs and preferences. This user-friendly feature enables quick and easy customization.

Self-cleaning

In some systems, steam generates a cleaning effect throughout the entire hydromassage system, guaranteeing a clean and hygienic experience every time it is used.

Control Panels

Pressure point button
Available in the Basic version.
Pressure point button to activate
any function from the hydromassage.

Electronic point button
Available in the Total version.
Electronic point button to activate and
deactivate the hydromassage. The
Manual function (Pressure point button)
is available by turning the push
button. The illuminated push button
ignites massage activation.

Digital panel
Available in the Total version. Digital
panel with LCD screen. Basic navigation
with three buttons that allow users to
activate, deactivate, control, and select
the various functions.

Remote control
Available in the Total Platinum
version. Remote control remote
control with touch screen.
Navigation screen on front
and on the back of the remote
controls each function, basic
control navigation with touch screen
representing the complete function
and over the activation of the function.

Types of Jets

**Jet of adjustable water
jet 10 mm**
Controlled jet that is
adjustable to alter the direction
of the water. This allows the
massage to be adjusted to
the user's needs and preferences or
achieved.

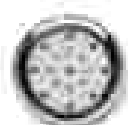

**Back relaxing water jet
12 mm**
The back jet has a relaxing
function. It allows a gentle
massage, as perfectly
designed for the back area.

Foot jet 12 mm
The foot jet consists of a
jet that is designed with
a unique structure to
provide a gentle massage on
the sides of the feet.

Air jet 12 mm
This air jet has a unique
structure, it allows a more
soft and gentle massage. This
jet design allows users to
achieve a more relaxing
experience.

Soft jet
The soft jet creates the
effect of air over water to
create a relaxing effect
towards the back of
the bath.

Surfex®

The warm, matt surface of this innovative mineral-based composite is perfect for creating exclusive baths with a sophisticated touch.

Durable material. Composed of a combination of solids, resins, catalysts and promoters, this material delivers exceptional durability.

Antibacterial. Exclusive zero porosity material that prevents the absorption of liquids and the proliferation of humidity and bacteria.

Repairable. Compact material that is easily repaired and restored to its original appearance.

Sustainable. Made of organic and 100% recyclable materials.

Anti-slip. Textured surface with superior anti-slip properties for maximum safety in the shower.

Efficient. Thermal insulating material that maintains water temperature leading to greater energy savings.

High quality. Gel Coat outer layer and a resin substrate combined with a fine selection of different mineral charges.

Warm texture. Providing a natural and pleasant tactile experience.

Anti-slip. Textured surface with superior anti-slip properties for maximum safety in the shower.

Resistant. Outer gel coating with high resistance to wear, fading, chemical agents and ultraviolet light.

Easy cleaning. The textured surface is easy to maintain and can be cleaned with soap and water.

Repairable. Highly re-sealable sanitary gel coating that makes it easy to repair.

Antibacterial. Outer layer that complies with the most demanding standards, which certify that viruses do not spread on the surface.

Features

Cast iron

The robustness of this material, combined with skilled craftsmanship and tradition, results in baths of a timeless nobility.

Robust. High level of mechanical resistance prevents deformation or damaged surface caused by any knocks.

Efficient. Thermal insulating material that maintains water temperature leading to greater energy savings.

Acoustic insulation. Noise-dampening properties reduce the impact of the noise of water.

Durable. Very fine and resistant material ensures a prolonged life cycle.

Easy cleaning. Enamelled surface that is easy to disinfect using standard products.

Accessories Collections

There are many specific items with important functions in the everyday bathroom experience

Key Benefits

Styles. Innovative design in different styles and finishes.

Versatility. Wide range of products with deck-mounted and wall-mounted models.

Dual installation. Installation kit with screws or adhesive included.

Quality. High-quality and long-lasting materials.

Stability. Stable against abrasive products, extreme temperatures, and UV light.

Resistance. Wall-hung items withstand loads of up to 5 kg.

Quickfix system. Swift and easy installation.

Sustainable. Designed with recyclable materials, packaged, and produced with minimum environmental impact.

Eternity. Long-lasting and polished chrome plating.

Easy to clean. No specific products are required for maintenance.

Finishes

PVD Finishes. With a physical process vaporization procedure that ensures an elegant, even, and scratch-resistant finish.

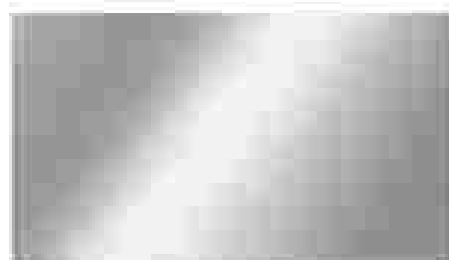

Painted finishes. With highly resistant polyethylene resin and pigments that maintain color permanently.

Accessories are key components for a complete bathroom space. From wall-hung robe hooks to freestanding toilet roll holders or on countertop soap dishes, there are many specific items with important functions in the everyday bathroom experience. Different collections offer a variety of designs including metallic or colour finishes and embrace new materials such as wood, felt and cork, bringing a warm and tactile element to the bathroom space.
